

Made and published by the Director General of the Ordnance Survey, Southampton

HEIGHTS are given in METRES above the Newlyn Datum
Bench mark lists, which may contain later levelling information and particulars of bench marks

 Non-coniferous trees
 Coniferous trees
 Surveyed trees
 Orchard trees
 Coppice, osier
 Scrub
 Bracken
 Heath
 Rough grassland
 Marsh, saltings
 Reeds

SYMBOLS

	Slopes		
	Cliff		
	Cave entrance		
	Rock		
	Boulders		
	Sloping masonry		
	Rondel building		
	Ditch/hoose		
	Archway		
	Change of boundary merging		
	AREAS notes		

VEGETATION CLASSIFICATION. Where space permits, tree and scrub symbols in woods are shown in groups of four, three, two or singly to indicate close, medium, open or scattered density of trees or scrub.

BOUNDARIES

The diagram illustrates the hierarchy of administrative boundaries. At the top, 'England & Wales' and 'Scotland' are shown. Below them, 'County Borough' and 'London Borough' are indicated. The 'County District' is shown as a sub-division of the County Borough. The 'Civil Parish' is shown as a sub-division of the County District. The 'Rural Borough' is shown as a sub-division of the Civil Parish. The 'Burgh County & Ward' is shown as a sub-division of the Rural Borough. The 'Co. Const. Bdy.' is shown as a sub-division of the Burgh County & Ward. A legend at the bottom defines the symbols used in the diagram:

B.B.		Base of Bank	F.F.		Face of Face
C.B.		Centre of Bank	F.W.		Face of Wall
C.C.S.		Centre of Great Stream	R.H.		Road of Head
C.D.		Centre of Drain	S.R.		Side of River
			E.K.		Edge of Kerb

Imperial equivalents for metric boundary divisions are given in parentheses.

AREAS

Area measurement is to plan edge only.
The number and area, in hectares (ha) and acres, is shown within each parcel of land.

4267		parcel number
1-809ha		area in hectares
4-47		area in acres

When identifying a parcel it is important to specify the number of the plan on which it is shown.
Enclosures or features joined for measurement of area are not shown.
Limit of area within which individual parcels are not shown.

To convert hectares to acres multiply by 2 471 05

To convert acres to hectares multiply by 0 404 69

NATIONAL GRID REFERENCE

The grid lines from part of the National Grid are shown at 100 metre intervals. To give a unique reference and define the position of a point to within 10 metres proceed as follows:

EXAMPLE From sheet TQ 0529

- Take the two letters preceding the sheet number.....TQ.....058
- Take the west edge of the grid square which the point lies on.....292
- Read the figures opposite this line on the north or south margin.....058
- Estimate tenths of metres from the grid line to the point (distance) *a*.....
- The resulting four-figure number is the easting.....291
- Take the south edge of the grid square in which the point lies.....05
- Read the figures opposite this line on the east or west margin.....291
- Estimate tenths of metres from the grid line to the point (distance) *a*.....
- The resulting four-figure number is the northing.....05
- The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing.....TQ 058291*a*
